

**Question:** What is the presale price and how will you hold the price of the token?

**Answer:** The price per BNB will be set during presale but we plan to raise about 30 + BNB Softcap. We will hold the price in two ways for SPRINT101. Heavy daily taxes starting from 70% and reduced by about 13% of initial tax daily until last day of sprint (7 days)

SPRINT Boost event: our special pump activity using funds set aside from marketing budget as well as working with other third party investors to BOOST the price of sprint tokens.

At the end of the first 3 days, we will start to buy back SPRINT101 tokens from investors exiting until we max out the BOOST funds. This will ensure smoother exit for our investors

**Question:** What happens on Day 8 and onwards? can we still sell the token on pancakeswap?

**Answer:** On day 8 preparation for a new token. Everyone must exit the previous token before day 7. We will however provide Liquidity between all tokens we make and a more long term token which allows people to still trade it  
Just in case someone is left in there

**Question:** The tax from day 1 to day 7 applies to sell transactions only or to both buy and sell?

**Answer:** Sales have taxes. For buys just 5%. Flat fee And all or 5% goes to holders  
For sell, 50/50 Liquidity and holders

**Question:** In the last month I see a attack in exchange and it caused millions of dollar right,so how will you improve the security any big bounty program

**Answer:** For now we are relying on well tested open source solutions for our contract development.

We also have an experienced solidity developer making sure that all loose ends are correctly closed.

We will continue to watch the space and make updates to subsequent sprint contracts as new vulnerabilities we have control over are discovered outside our ecosystem.

**Question:** What about our Market value of our token

**Answer:** 70 BNB hard cap. 510,000,000,000,000 total supply  
More info will be revealed once presale is complete and final info will be automatically calculated after presale

**Question:** What was your vision of the project at the beginning and how it looks for you now?

**Answer:** « Information for you to better understand what we are doing, the vision, the goals and how far we have come »

The main idea was to host multiple pump tokens with less distraction and more coordination. Everyone will get a fair chance to enter as opposed to previous pumps where the investors already enter before the rest of the people and always profit.

I wanted a place where all people get a fair chance, and still don't have to worry about the various scams going on around the crypto space. If we profit, we profit together, if we lose, also together.

After all these weeks, we have created an idea around it that I have taken a liking to. SPRINT,

the name actually describes what we are doing perfectly and I cannot wait to see what comes out of it!

It is important to note that Investors who don't exit at the right time might lose funds as with all other pump rallies and all other tokens launched today. We do have additional safety for all in our case as everything is organized and automated; all info is available so investors know the best possible time to exit their positions

We have also added taxes daily to ensure the ride is as smooth as possible; subsequent ones might even contain sell limits to keep the rally going as high as we can.

We have set aside funds in addition to all the marketing to ensure there is enough juice to pump the prices and are looking forward to working with private individuals interested in pumps as well.

So far, the idea is looking good and we have had many people showing massive support; I personally will stop at every opportunity to appreciate each and everyone of you!

You are doing an amazing job and thanks for boarding this train.

**Question:** What's the tax rate on presale tokens?

**Answer:** No taxes on pre-sale.

Taxes kick in after presale (5% flat fee for buy). Sprint duration 7 days starting 12 hours after we hit hard cap, exit once you feel you have made enough

**Question:** How do we know this is not a Rug?

**Answer:** For now, it's mainly because behind the scenes our token is a typical pump token which basically means at some point when the crypto market is better regulated, pumps will no longer be something we can get away with due to regulations.

**Question:** What's the reason the owners don't want to show identities?

**Answer:** Both admin and devsee have other projects which you can indirectly trace if you really want to know the person behind the voice. Our contract developer is also a well vast solidity dev who has worked on quite a lot of public contracts.

**Question:** How many days is the lifetime for this token?

**Answer:** It has lifespan of only 7 days

It has a lifespan as it serves only one purpose. After that lifespan expires, we set up a new sprint SPRINT102

**Question:** Why Dxsale? Dxsale is more like a rug pad!

**Answer:** It has more BSC investors as I understand. We can always try out other platforms as we grow. If anything it goes to show that non rug projects can come from there 💪

**Question:** The tax rates will be different from each dex? And how will we know which to use at the time we want to sell?

**Answer:** No, while we don't encourage people to sell at the least for first 48 hours, we want to make sure all investors who feel they don't want to continue can exit their trades successfully Taxes are the same across dex.

the are only different per day

**Question:** Why use different dex's to sell on different days?

**Answer:** Because of taxes. On day 1, 2 ,3 pancake swap cannot sell at the taxes for those days, so we have gone the extra miles spending actual BNB to research all available exchanges to see which one allows to sell or not

**Question:** Is this a normal token that you buy and then just hold and watch the graph.

**Answer:** No, it's a PUMP token, you buy at the start, we pump it, you exit when you are profitable enough.

The only difference here is things are coordinated, everyone has equal chances to buy and everyone is aware of the different timelines.

The following information may apply when you want to sell SPRINT101 due to high taxes. We encourage all investors to HOLD for first 3 days,

Day 1: DODO

Day 2: BoggedFinance, Dodo

Day3: dex.guru, 1inch, BoggedFinance, Dodo

Day4: Pancakeswap, BoggedFinance, dex.guru, 1inch, Dodo

Day 5: Pancakeswap, dex.guru, BoggedFinance, 1inch, Dodo,

Day 6, 7: All dex

**Question:** What is the daily tax thing?

**Answer:** Taxes for SPRINT101

- ✓ 50% Tax redistributed to investors
- ✓ 50% Tax added to LP
- ✓ 15% daily tax cut until 0%
- ✓ Daily tax on sell trades will be as follow:
  - Day 1 - 70% (for how to sell see #sell)
  - Day 2 - 53%
  - Day 3 - 42%
  - Day 4 - 28%
  - Day 5 - 14%
  - Day 6 - 10%
  - Day 7 - 0% - End of SPRINT

- ✓ Daily tax on buy trades will be as follow:
  - Day 1 - Day 7: 5% flat fee redistributed to holders.

**Question:** Any minimum quantity to buy from presale to qualify?

**Answer:** The minimum to qualify should be 0.05 bnb

**Question:** What does this mean? Token is only meant to last 7 days?

**Answer:** Yes, The first PUMP coin on BSC! And now we found an exchange that allows you to

sell at 70%

**Question:** What do the percentages mean? What do you mean sell at 70%?

**Answer:** It means when you buy the coin let's say today, and we launch tomorrow. Tomorrow tax will be 70% which means if you try to convert it back to BNB or something else, you will pay 70% tax  
Next tomorrow it will be less by 20%  
And the next day and the next day until the end of Sprint

**Question:** What happens at the "end of SPRINT" exactly?

**Answer:** You need to decide yourself when you have made enough profit to exit

**Question:** How did sprints do in the past?

**Answer:** This is the first one, so you are essentially an angel investor 🚀

**Question:** The 70% tax is also for buying it right?

**Answer:** No, only selling. Tax 5% flat for buying flat fee. The main tax is for selling  
And all tax is split 50/50 to holders and LP.

**Question:** Tokens are destroyed? but why not just let it run at 0% tax at that point?

**Answer:** We are experimenting with the idea of the end of Sprint for now, nothing much happens But Liquidity will be pulled at 30 days to support future sprints.

**Question:** Do we know what the tax redistribution goes to?

**Answer:** To holders account automatically like in SAFEMOON 50% redistributed to all holders. 50% added to LP to make the pool stronger.

**Question:** Where does the buyback funds come from?

**Answer:** For the first sprint it comes from presale. Only 70% is added to the pool  
For subsequent sprints, we combine that with the LP of the last sprint.

**Question:** When is it released ?

**Answer:** At the end of presale or less than 12 hours after the hard cap is met.

**Question:** Is this a normal token that you buy and then just hold and watch the graph?

**Answer:** It has lifespan of only 7 days  
It has a lifespan as it serves only one purpose. After that lifespan expires, we set up a new sprint SPRINT102. The target is for short term investors. There are many long term tokens already. We try to target a more unique market.

**Question:** When will the new token launch? Any specific date?

**Answer:** End of presale it launched. (6 June)

**Question:** The sprint token lasts for 7 days only? Can anyone explain me this

**Answer:** Yes, there will be new sprint coins every other time. It means, once we launch, we pump the price for two, three days, investors should start to cash out their profits once they feel comfortable with the profits they have made, after day 3, we will kick off buy back process where we try to use some of reserved funds from presale and previous taxes to reduce the effect of existing investors on the price.

**Question:** Will the presale contributors still receive their purchased tokens or will we have to buy again?

**Answer:** if we launch it, you receive SPRINT101, no contributions needed from your side anymore, you just need to watch your investment grow and exit at the right time.

if we cancel it, you get back BNB, you need to add your contribution to the new presale when it will be listed

and if you feel you want more within the first 3, 4 days, you can always buy on pancakeswap.

After the first 3 days i don't think it's advisable to buy 101 anymore, I have to wait for SPRINT102 or the next sprint.
